

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph of Regulation (EU) 2020/852

Product name: UB Emerging Markets Infra
Legal entity identifier: 743700E2HG69BMXKTD04

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ Yes	☐ ☒ ☒ No
☐ It made sustainable investments with an environmental objective: ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: ____%	☐ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☒ It promoted E/S characteristics, but did not make any sustainable investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this fund are climate change mitigation, and sector and industry specific significant environmental and societal factors that would typically cause elevated ESG risks in the industry in question.

● *How did the sustainability indicators perform?*

● ...and compared to previous periods?

Promotion of climate change mitigation was measured by monitoring the carbon intensity and carbon risk indicators of the fund. The indicators are based on Sustainalytics and Morningstar ESG-databases and methodologies. Carbon intensity was lower and the fund had a lower exposure to carbon risk than the Morningstar category consisting of similar funds. The fund's investments were weighed towards negligible carbon risk assets. The indicators developed as follows, status in Q4 2025 and previous periods:

CARBON INTENSITY RELATIVE TO PEER GROUP

Morningstar Category: EAA Fund Sector Equity Infrastructure

Carbon Intensity

Carbon intensity (tCO2e/USDm in Revenues) measures the ratio of a company's greenhouse gas emissions (Scope 1 and Scope 2) to its revenues. The Fund's carbon intensity is calculated as an asset-weighted average of the individual carbon intensities of the Fund's investments. The Fund's carbon intensity is benchmarked to the Morningstar Category stated above.

CARBON INTENSITY DEVELOPMENT

CARBON RISK RELATIVE TO PEER GROUP

Morningstar Category: EAA Fund Sector Equity Infrastructure

Carbon Risk

The Sustainalytics Carbon Risk Rating measures the extent to which the value of an investment is impacted by the removal of fossil fuels and the transition to a low-carbon economy. The Fund's carbon risk is calculated as an asset-weighted average of the individual carbon risks of the Fund's investments. The Fund's carbon risk is benchmarked to the Morningstar Category stated above.

HOLDINGS CARBON RISK DISTRIBUTION

The adequate management and prevention of potential negative impacts caused by sector and industry specific significant environmental and societal factors that would typically cause elevated ESG risks in the industry in question, was measured by monitoring the ESG risk indicators of the fund. The indicators are based on ESG-databases and methodologies of Sustainalytics and Morningstar. In assessment of the ESG risks the indicator takes into account to what kind of ESG risks a company is exposed to and how well it manages those risks. Significant sources of ESG risk vary according to sector and industry. Low ESG risks indicate that either a company's ESG risk exposure is minor, or that it manages its risks well.

The overall ESG risk of the fund was moderate, and the risk level was slightly lower than the Morningstar category comprised of similar funds. The ESG risk of the fund remained mostly at the same level during the reporting period. The sustainability risk distribution of the fund's investments was weighted towards medium- and low-risk assets. The indicators developed as follows, status in Q4 2025 and previous periods:

SUSTAINABILITY RATING

The Morningstar Sustainability Rating is based on relative fund comparison according to Morningstar's methodology, where Morningstar benchmarks funds according to their current and historical sustainability risk factors. The Fund's rating relative to its peer group is measured by the number of globes ranging from five (the top performing 10%) to one (the least performing 10%).

SUSTAINABILITY RISK RELATIVE TO PEER GROUP

Global Category: Infrastructure Sector Equity

Sustainability Risk Score

The Sustainalytics ESG Risk Rating measures the degree to which a company's economic value is at risk due to Environmental (E), Social (S), and Governance (G) factors. The Fund's sustainability risk is calculated as an asset-weighted average and classified on a five-point numerical scale: negligible (0-10), low (10-20), medium (20-30), high (30-40), and severe (>40).

HOLDINGS SUSTAINABILITY RISK DISTRIBUTION

SUSTAINABILITY RISK DEVELOPMENT

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The fund promotes environmental and social characteristics alongside other objectives but is not committed to making sustainable investments. However, the Fund has made investments in environmentally sustainable economic activities that meet the criteria of the EU taxonomy. Details of these investments, which comply with the EU taxonomy, are given later in this report.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund considered principal adverse impacts using a risk-based approach. The principal adverse impacts are analyzed in connection with sustainability risks during the due-diligence

process and monitored during the investment. If anomalies such as exceptionally high values are detected in the analysis, the reasons behind them are investigated prior to the investment. Potential investments with exceptionally high adverse impacts may be excluded from investments. At present limited data availability may limit the analysis of principal adverse impacts. The principal adverse impact indicators of the fund Q4 2025:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PRINCIPAL ADVERSE IMPACT (PAI) INDICATORS

DATA COVERAGE

Mandatory Indicator - Greenhouse Gas Emissions: GHG Emissions, Scope 1 (CO2e Tonnes per Year)	3 589	99,8%
Mandatory Indicator - Greenhouse Gas Emissions: GHG Emissions, Scope 2 (CO2e Tonnes per Year)	975	99,8%
Mandatory Indicator - Greenhouse Gas Emissions: GHG Emissions, Scope 3 (CO2e Tonnes per Year)	21 299	94,6%
Mandatory Indicator - Greenhouse Gas Emissions: GHG Emissions, Scope 1-3 (CO2e Tonnes per Year)	25 830	94,6%
Mandatory Indicator - Greenhouse Gas Emissions: Carbon Footprint, Scope 1-3 (CO2e Tonnes per EURm Invested)	692	94,6%
Mandatory Indicator - Greenhouse Gas Emissions: Carbon Intensity, Scope 1-3 (CO2e Tonnes per EURm in Revenues)	1 404	94,6%
Mandatory Indicator - Greenhouse Gas Emissions: Exposure to Companies Active in the Fossil Fuel Sector (%)	22,5%	99,8%
Mandatory Indicator - Greenhouse Gas Emissions: Share of Non-Renewable Energy Consumption (%)	89,3%	50,9%
Mandatory Indicator - Greenhouse Gas Emissions: Share of Non-Renewable Energy Production (%)	5,9%	50,6%
Mandatory Indicator - Greenhouse Gas Emissions: Energy Consumption Intensity (GWh per EURm in Revenues)	—	0,0%
Mandatory Indicator - Biodiversity: Activities Negatively Affecting Biodiversity Sensitive Areas (%)	0,0%	99,8%
Mandatory Indicator - Water: Emissions to Water (Tonnes per EURm Invested)	—	0,0%
Mandatory Indicator - Waste: Hazardous and Radioactive Waste (Tonnes per EURm Invested)	1	99,8%
Mandatory Indicator - Social and Employee Matters: UN Global Compact Principles and OECD Guidelines Violations (%)	0,0%	99,8%
Mandatory Indicator - Social and Employee Matters: Lack of UN Global Compact and OECD Monitoring and Compliance Mechanisms (%)	67,3%	99,8%
Mandatory Indicator - Social and Employee Matters: Unadjusted Gender Pay Gap (%)	—	0,0%
Mandatory Indicator - Social and Employee Matters: Ratio of Female to Male Board Members (%)	22,1%	99,8%
Mandatory Indicator - Social and Employee Matters: Exposure to Controversial Weapons (%)	0,0%	99,8%
Voluntary Indicator - Greenhouse Gas Emissions: Investments in Companies without Carbon Emission Reduction Initiatives (%)	63,6%	99,8%
Voluntary Indicator - Social and Employee Matters: Investments in Companies without a Human Rights Policy (%)	23,5%	99,8%

What were the top investments of this financial product?

The following table presents the largest holding by sector and country.

LARGEST INVESTMENTS

	Sector	% Assets	Country	EU SFDR Classification
SATS Ltd	Industrials	4,6	SGP	—
International Container Terminal Services Inc	Industrials	4,2	PHL	—
Hong Kong and China Gas Co Ltd	Utilities	4,2	HKG	—
Manila Water Co Inc	Utilities	4,1	PHL	—
Grupo Aeroportuario del Pacifico SAB de CV ADR	Industrials	4,1	MEX	—
Companhia De Saneamento Basico Do Estado De Sao Paulo ADR	Utilities	4,0	BRA	—
COSCO SHIPPING Ports Ltd	Industrials	3,9	CHN	—
Guangdong Investment Ltd	Utilities	3,9	CHN	—
Anhui Expressway Co Ltd Class H	Industrials	3,8	CHN	—
Grupo Aeroportuario del Sureste SAB de CV ADR	Industrials	3,8	MEX	—
ENN Energy Holdings Ltd	Utilities	3,8	CHN	—
Jiangsu Expressway Co Ltd Class H	Industrials	3,7	CHN	—
China Merchants Port Holdings Co Ltd	Industrials	3,6	CHN	—
Cia Energetica DE Minas Gerais - Cemig ADR	Utilities	3,5	BRA	—
Airports Of Thailand PLC	Industrials	3,5	THA	—

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: year 2025

What was the proportion of sustainability-related investments?

The fund made investments that promote environmental and/or social characteristics and took these characteristics into account in its investment decisions. During the reporting period, 96% of the fund's investments promoted environmental and social characteristics (category #1). 4% of investments were other investments.

What was the asset allocation?

In which economic sectors were the investments made?

INVESTMENT SECTOR DISTRIBUTION

	%
Industrials	58,3
Utilities	38,2
Energy	3,6
Total	100,0

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

PROPORTION OF INVESTMENTS INVOLVED IN FOSSIL FUELS

Fossil Fuel Involvement	29,6%
Thermal Coal Extraction Involvement	0,0%
Thermal Coal Power Generation Involvement	7,6%
Oil Sands Extraction Involvement	0,0%
Arctic Oil & Gas Exploration Involvement	0,0%
Oil & Gas Production Involvement	23,2%
Oil & Gas Power Generation Involvement	8,9%
Oil & Gas Products and Services Involvement	4,3%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product is not committed to making sustainable investments and does not aim to make investments aligned with the EU Taxonomy. Investments under the EU Taxonomy for the reporting period are shown in green in the chart below. The percentage of EU Taxonomy aligned investments shown is based on data provided by an external data provider (Sustainalytics & Morningstar), which is not verified by a third party. The fund only reports on the Taxonomy data that is available. Since only partial data on Taxonomy alignment is available as reported by the companies, the proportion of Taxonomy aligned investments is partly based on the proportions calculated by the data provider. Figures based on the data provider's estimates will be replaced by data reported by companies as the reporting of Taxonomy alignment expands.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures. Non-Taxonomy-aligned includes: Turnover: 37,7% unknown investments, CapEx: 72,5% unknown investments, OpEx: 100% unknown investments.

What was the share of investments made in transitional and enabling activities?

The financial product is not committed to investing in transitional and enabling activities. During the reporting period, the proportions of investments made in these activities:

	Transitional	Enabling
OpEx	0 %	0 %
CapEx	0 %	0 %
Turnover	0 %	0,2 %

*Including sovereign bonds

● ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

The share of investments aligned with the EU Taxonomy increased during the reporting period for both turnover and CapEx, compared with the previous reference period. The taxonomy-aligned share based on turnover rose from 7.9% to 15.2%, and the share based on CapEx increased from 5.8% to 11.6%. The taxonomy-aligned share based on OpEx decreased from 1.3% to 0%. During the reporting period, the share of investments related to transitional activities and enabling activities was 0% for both CapEx and OpEx. The share of investments related to enabling activities was 0.2% based on turnover. The share of investments related to transitional activities has remained unchanged compared with the previous reporting period, while the share of investments related to enabling activities has decreased slightly. Data coverage has generally improved, as the share of unclassified investments has decreased for both turnover and CapEx.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product is not committed to making sustainable investments with an environmental objective. During the reporting period, the proportion of sustainable investments that contribute to environmental objectives and do not comply with the EU Taxonomy is 0%.

What was the share of socially sustainable investments?

The financial product is not committed to making sustainable investments. During the reporting period, the share of socially sustainable investments is 0%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Category “#2 Other” included only currency hedges and cash positions that are necessary for the execution of the investment strategy. Minimum environmental and social safeguards did not apply to currency hedges and cash positions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund’s investment process includes ESG-integration: The fund included information on environmental and social characteristics into the investment decision process and carried out positive selection of the investment targets based on environmental and social characteristics.

The fund promoted environmental and social characteristics as an active owner by voting in the general meetings of the investee companies through ISS Proxy Voting service.

The votes of the fund are cast based on a sustainability-promoting voting policy ([International Sustainability Proxy Voting Guidelines](#)). The votes are given to promote, among other things, transparency, climate change mitigation and good governance, as applicable to the themes of each meeting and votable ballots. In 2025 there were six meetings including voting, and the fund voted in six meetings on different markets as follows:

Market Breakdown

Market	Votable Meetings	Voted Meetings	Percentage
Mexico	3	3	100.00%
Brazil	2	2	100.00%
Chile	1	1	100.00%

In addition, the fund participated in United Banker's general stewardship and engagement activities, including the CDP-campaign investor letters and Science Based targets -initiative (<https://www.cdp.net/en/campaigns/science-based-targets>).
